### SUMMARY

As a recent graduate of the Faculty of Engineering with a major in Electromechanics, I've shifted to front-end development. I'm passionate about creating user-friendly and responsive websites. Through self-learning and formal training, I've completed several projects that showcase my skills in HTML, CSS, JavaScript, and modern front-end tools.

---

### INTERNSHIPS

#### Digital Egypt Pioneers Initiative (DEPI)

May 2024 - Present

I've worked on diverse front-end development tasks, including:

- APIs
- Responsive Design
- ReactJS

#### Projects

- CoreOne: An electronics online store with a fully responsive design. Features include category and product showcase, user authentication, and shopping cart functionality. Built using ReactJS, Bootstrap, and Embla Carousel. This project is still in progress for additional features.

CoreOne Website [↗](#)

- Personal Portfolio: A simple, responsive personal portfolio to showcase projects and skills.

Portfolio Website [↗](#)

- Movie Landing Page: A landing page for movies, designed for desktop only, utilizing API integration.
